

# RoboBuilder Li-Poly Battery Charging

RoboBuilder Co., Ltd.

Li-Poly Battery Built In RoboBuilder 5740K Charging

How to connect Kit Adapter & Li-Poly Charger

## \* Safety Instructions for Li-Poly Battery Charging.

- 1) Be sure to confirm that black pins are inserted in "3 Cell 11.1V" and "700 mA" both.  
(Second position is "3 Cell 11.1V" from the top part,  
And, the second position is "700mA" from the bottom part.)

- 2) During charging, Red and Green LED is ON.  
Upon completing the charging, only Green LED is ON as shown in the below.

- 3) Normal charging time is about 30 minute to 1 hour depend on remaining the Li-Poly battery status. If RBC Power LED is gone to "RED", you should charge immediately.
- 4) Make sure to power off when you don't use.  
If discharged fully, Li-Poly Battery would not be charged again.
